

Pure Herbal Remedies

PRODUCT INFO GUIDE

KIDDIES RANGE

There are so many products available for children yet all of them contain sugar, colourants, flavourants or lactose which are the very things we, as natural practitioners, are trying to get them to stay away from. For this reason we have come up with this kiddies range. It is 100% herbal (raw herbs, not extracts) and comes in a base of vegetable glycerin, colloidal silver and vodka. The glycerin is a natural preservative made purely from vegetables and happens to be very sweet, so makes the products taste good. The colloidal silver is also a natural preservative which helps kill fungus and bacteria among its various other uses. The products all come in a 50ml spray bottle, which is easy and fun for kids to take

Coughy Geoffy

Aniseed –combats infection, clears mucous.

Olive leaf – anti viral, anti bacterial, anti parasitic, boosts immunity.

Ginger - increases absorption, cleans the colon, reduces bloating and gas.

Paraherb is used for the elimination of all bodily parasites and their eggs. It also cleans the blood and detoxifies the colon at the same time. It should be taken as a 21 day course to kill all parasites and stop the breeding cycle.

There are over 100 different types of parasites that live in the human body and they multiply at a very scary rate. One female can lay anything from 3000 to 20000 eggs every day! These parasites range in size from microscopic organisms to 100 foot long worms. They eat you from inside out, burrowing holes through your organs and cause major damage. They eat nutrients meant for you and sap you of your energy, making you feel tired, weak and toxic.

Symptoms of parasites may include constipation, bloating, weak immunity, viral or fungal infections, skin rashes, fatigue, depression, insomnia, anemia, dry skin and hair, mental dullness, anal itching, and much more including chronic illness and even cancer.

The whole family should do a parasite cleanse every six months

Note: According to Chinese medicine principles, Paraherb is a cold formula and may cause abdominal cramping in people with cold constitutions. In this case take Paraherb with Digest Energy. For people with severe IBS, we recommend taking IBS Formula with it.
